Curve Cushion Party Lounger Component Assembly Instructions

Congratulations on the purchase of your Tropitone Curve furniture. Read through all steps before fastening components together.

CAUTION: Do not try to lift or flip furniture components with only one (1) person. Components may be heavy and awkward to handle and may result in injury to persons or damage to property if not lifted properly.

MORE INFORMATION

For care and cleaning instructions, refer to the Tropitone® Care, Maintenance, Safety & Warranty Information guide included with your furniture and available at www.tropitone.com/warranty.

Additional care information, “How To” videos and assembly instructions for Tropitone Outdoor Furniture and Basta Sole shade products are also available at our website.

If you have difficulty understanding any of the instructions and need assistance while assembling your Curve Cushion Daybed, please call Tropitone’s Customer Service Center at 949-951-2010.

- 1/4” Lock Washers x12
- 1/4 x 1-1/4” Button Head Cap Screws x12

✓ Check that all items in the Parts List are in your carton.

Curve Cushion Party Lounger

Component Assembly Instructions

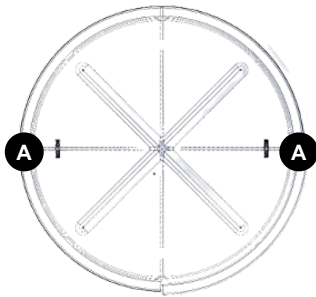

STEP 1:

Prepare a smooth, non-scratch surface (a tarp or pool towels can be placed on your work surface) so components can be placed side-by-side for assembly. NOTE: When components are being assembled, two (2) persons are required during assembly, with the helper holding the furniture components stable. This is especially critical when three (3) or more parts are being assembled into a non-linear configuration.

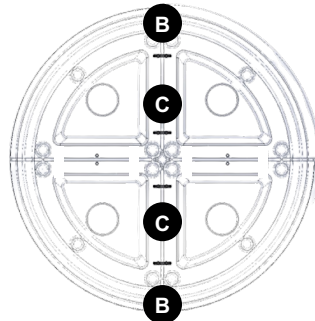

STEP 2:

Put pieces together in preferred upright assembly. Locate and align predrilled holes on the top of the components that are to be joined (underneath cushions). Fully insert connector bracket posts into adjoining holes. Ensure the bracket is even to the bottom of both components. **DO NOT INSERT SCREWS UNTIL STEP 3!**

PARTY LOUNGER TOP
(under cushions)

PARTY LOUNGER
BOTTOM

STEP 3:

With the connector brackets even to the bottom of both components, insert a button head cap screw with a lock washer through the connector bracket and hand tighten into the nutsert (*diagram Detail A*). Screw straight into each nutsert or you will cross thread the screw and may pull out the nutsert. Repeat with the remaining lock washers and button head cap screws until all screws with washers are inserted and hand tightened. *Don't fully tighten the screws until step 4.*

STEP 4:

Tighten all button head cap screws with the 5/32" hex key (Allen Wrench). **DO NOT** over tighten the screws; tighten only until the lock washer flattens.

STEP 5:

With all brackets installed on the top of the units, gently tip unit onto side for access to the bottom of units, using two (2) people. Repeat bracket installation for *diagram details B and C*. Your furniture should now be fully assembled and ready to gently tilt back into an upright position, using two (2) persons. Move the assembled furniture to its place of use and level by adjusting glides (if needed).

NOTE: It is especially critical that two (2) persons work together when three (3) or more parts are being assembled into a non-linear configuration, with the helper holding the components stable.

STEP 6:

Place and attach cushions/pillows onto the furniture component(s) and enjoy!
